## English Activity

What is S G D ?

Ans S G D stands for "Affordable and Clean Energy"

It is one of the 17 Sustainable development Goals by the United Nations. Its aim is to ensure access to affordable, reliable, sustainable and modern energy for everyone by 2030

Why is clean Energy Important ?

Ans • Electricity is important for schools, hospitals, and industries.

- Many poor and rural families still lack access to power
- Burning coal and diesel pollutes the air and causes

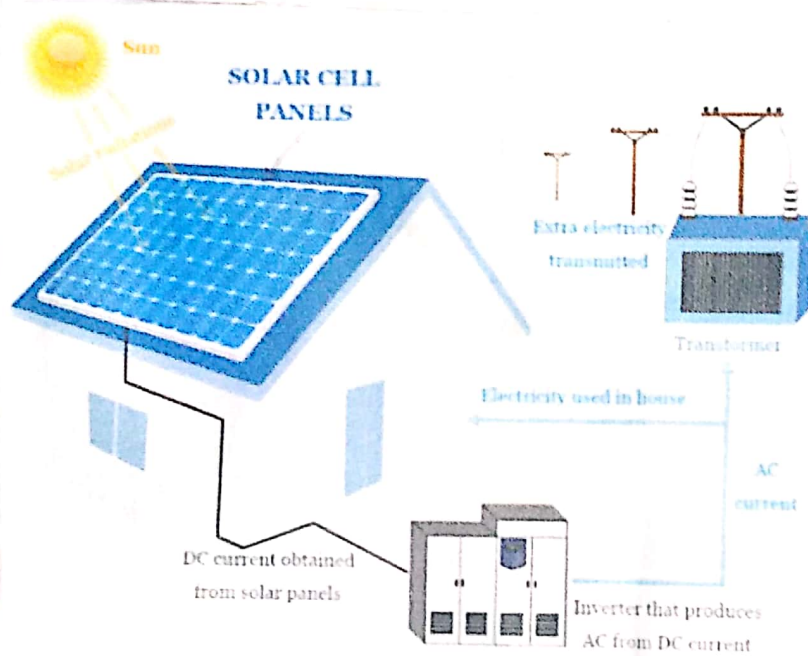

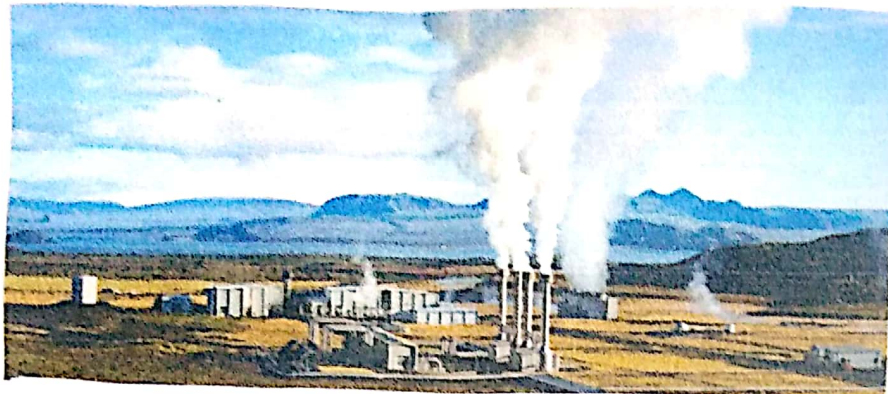

climate change

- Clean energy like solar, wind and hydropower is better for our future.
- It helps us live a healthy and modern life without harming the environment.

Goal: Ensure everyone has access to clean and low-cost energy.

Location of Manipur

- Located in Northeast India with hilly terrain and many rivers.
- Ideal for hydroelectric power and small solar project
- Some villages still face electricity problems
- The government is promoting solar lights and

rooftop panels.

Location of Haryana

- A sun-rich state with many solar power projects
- Rooftop solar systems are common in cities like Gurgaon and Faridabad.
- Biogas plants are being used in rural areas
- The state is focusing on solar irrigation for farmers

Impact on People and Environment.

- Poverty reduction by creating new jobs
- Better education students can study under solar light
- Environmental Care.
- Healthy Homes.
